

## My Classroom Default Settings

**My Classroom** is your student hub in LevelUp. Here, you can monitor your students' progress and book assignments, grade quizzes, set up groups of students based on reading level, control access to LevelUp Land, customize the bookshelf, and manage reading level assessments. For some of the tabs, there are default settings that teachers have the option of changing to personalize the LevelUp experience for their students. The chart below shows each of these settings and their defaults.

TAB	SETTING NAME	DESCRIPTION OF SETTING	DEFAULT SETTING
ROSTER	Quiz Frequency	Adjusts how often students are given comprehension quizzes after reading a book.	After every book
	Constructed Response	Comprehension quizzes for books above 330L contain a constructed response (short answer) item, which can be turned on/off. If left on, teachers will grade student responses.	ON
GAMING	Game Access	Allows students to enter LevelUp Land.	ON
	Limit During Class Hours	Limits time spent in LevelUp Land; only applies during Class Hours.	10 minutes
BOOKSHELF SETTINGS	Language	Limits language of books displayed on student's bookshelf (but not search results).	English
	Bookshelf Range	The bookshelf automatically adjusts with each change in a student's Lexile measure. The teacher can widen or narrow this bookshelf range. If assessments are disabled, the teacher can set a specific Lexile range for the student's bookshelf.	100L below to 50L above student's Lexile
	Search	Turns on/off the search bar.	ON
	Search Filters	Turns on/off basic search filters (Category, Language, Fiction & Nonfiction).	OFF
	Search Results	Shows all search results or limits results to books in a student's bookshelf range.	Show all results
LEXILE ASSESSMENTS	Bookshelf Rows	Display/hide bookshelf rows and adjust the order of their display.	Display all rows
	Assessments ON/OFF	LevelUp automatically assesses students to determine their reading level and delivers books in each student's "just right" reading range. With assessments disabled, LevelUp will not track student reading level progress. This setting impacts the "Bookshelf Range" setting.	ON
