polish remover, can cause blindness and brain damage after a few sips. Paint thinner is another product that contains dangerous alcohols. These alcohols are not anything you would want to drink—they are extremely poisonous.

The kind of alcohol that people drink is called ethyl alcohol, or ethanol. Beer, wine, whiskey, rum, vodka, tequila, and gin are just a few kinds of beverages that contain ethyl alcohol. Large amounts of ethyl alcohol, or ethanol, can act as a poison. So while it may not be as toxic as the other kinds of alcohol, ethanol
